

Program Evaluation Survey of Mistakes – Find the Mistakes

The following pages present a hypothetical evaluation tool that was intentionally created by the School of Medicine's Office of Assessment and Evaluation (OAE) to reflect common mistakes made when designing a survey, and to reflect the majority of mistakes listed in the companion document entitled, "Mistakes in Survey Design and Item Writing – Quick Tips Guide." There is an additional companion document entitled, "Survey of Mistakes – Answer Key," that notes the common mistakes in the context of this particular hypothetical evaluation tool. See if you can identify the mistakes in this evaluation tool before reviewing the quick tips guide or answer key.

OAE welcomes your feedback. If you wish to provide feedback related to this resource or to the two companion resources, please complete our [Feedback Form for Resources – Mistakes in Survey Design and Item Writing](#).
